darren.inglebrae@bigpond.com

## Welcome to Inglebrae Farms 2021 Annual Bull Sale.

This year we have catalogued 37 HBR / APR registered bulls. And as normal, they are all rising two-year-olds. For the first time in a few years this group of bulls are once again paddock reared and finished on oat crops. Born 2019, in the midst of the worst drought imaginable, they were fed hay when on their mothers and from weaning have only been grazing improved pastures and as mentioned currently grazing some of the best oat crops in years. The seasons have defiantly changed for us here in Tenterfield.

The bulls will present at our normal target weight, averaging around 800kgs with being pasture reared. Treatments include - 7 in1, vibrio, three-day sickness, tested negative to pesti, DNA tested for sire verification, Breedplan figures, semen morphology tested, and are all ready to go. NOTE: the bulls are worked with dogs, side by sides, utes and or on foot.

The six Reference sires come with our utmost recommendation and are all selected for what I like to call the 'OLD COOL' being long, deep, soft coated thick cattle with good gait and feet that walk out straight! And, oh yeh, the odd EBV or two thrown in!! There are plenty of bulls suited to heifer mating's with 28 of the 37 bulls catalogued 'BELOW AVERAGE FOR BIRTH WEIGHT', with good growth, carcase, milk or marble that can be found throughout the catalogue for you to tick off on the paperwork, before you have a look.

Throughout the catalogue I make comments of 'sleep easy' heifer bulls due to their outstanding figures for calving ease. And as the phrase suggests you should sleep easy through calving. Note our sale supplementary sheet will have the actual birth weights displayed to back up the 'Estimated Breeding Values' (EBVs). All our calves are weighed the day they are born at Inglebrae.

Sale is on-farm at the Braeburn property, Tenterfield, but will incorporate on-line bidding with Elite Livestock Auctions for live bidding.

For the Open day and on Sale day the bulls can be inspected in large, grassed viewing pens where the bulls can be walked around freely.

Note the free freight service we offer the week following the sale courtesy of the Inglebrae truck of up to 500km. We run east down into the Northern Rivers, south along the New England, west and north into Queensland. Basically, you travel to us, (or purchase on-line) and I will personally bring them to you.

Thank you to all our valued clients of the past years, and any new enquires are always more than welcome at any time with inspections by appointment.

On behalf of Joe & Pat Richardson and family  
Regards Manager Darren & Kelly Battistuzzi

# Sale Details

## Inspection

Sale day inspections from 9:30am. Bulls will be in large viewing pens so they can be walked around easily. Bull Walk Open day Wednesday June 23rd from 10am. If you can't make the bull walk paddock inspections are very welcomed by appointment. Contact Darren 0407 023 062 or our agent Ben Sharpe, Ray White Rural Tenterfield, 0428 364 487.

## Health

Bulls have had 3day, Vibrio, 7 in 1, are Pesti tested negative, semen and morphology tested. We are a JBAS 6.

## Sire Verified

All Bulls have been DNA tested Sire Verified.

## Insurance

We highly recommend that purchasers insure their bulls as most young bull break downs are through injury. Our agent will be able to assist you on the day.

## Rebate

2% rebate to outside agents introducing buyers in writing 24 hours prior to the sale and settling within 7 days.

## Disclaimer

The vendors, agents and their representatives accept no liability for accidents that may occur any persons attending the sale. Visitors enter the cattle pens at their own risk CHILDREN MUST NOT enter the yards or viewing pens. While all care has been taken in the preparation of this sale catalogue vendors and agents accept no responsibility for any errors or omissions contained in this publication.

## Arrival of your new Bull

Sale day is a big day for your new bull so when he arrives home unload him at the yards into a group of cows and or steers (never lock them up on their own). Provide hay and water and then leave them to settle in.

## Mating new young Bulls

Newly purchased young bulls should not be placed with older bulls for multi-sire joinings. The older dominant bull will not allow the young bulls to work and will knock them around while keeping them away from the cows. Use new bulls in either single sire groups or with young bulls their own age, if a number of young bulls are to be used together, run them together for a few weeks before joining starts. They will sort out their pecking order quickly and have fewer problems later. When the young bulls are working inspect them regularly and closely.

## GST

This is to be added onto the purchase price at the fall of the auctioneer's hammer. You will be invoiced for purchase price plus GST.

## Transport

Anyone wishing to make their own transport arrangements may do so. However, delivery of bulls, the week following the sale, is complementary and curtesy of the Inglebrae truck within a 500km radius. Please tick the free delivery box on the buyers instruction slip in the back of the catalogue and leave your phone number and details if you would like us to deliver.

## Accommodation

Tenterfield has numerous pleasant options for accommodation.

We recommend The Golf Club 02 6736 1480

They not only have quiet accommodation but great meals and only 11km from the sale venue. Also we recommend Tenterfield Bowling Club 02 6736 1023 Best Western 02 6736 1066

## Refreshments

Complimentary BBQ and refreshments are available on the day.

# Sale Address

## On Property

1221 'Braeburn' Bruxner Wy Tenterfield

### Directions

#### From Tenterfield

Travelling North out of Tenterfield on the New England Hwy for 4km turn left on to the Bruxner Wy towards Goondiwindi and travel 7kms. We are on the left.

#### From Wallangarra

Travelling South on the New England Hwy. Turn right onto the Bruxner Wy towards Goondiwindi 4km before Tenterfield. Then travel 7km along Bruxner Wy. We are on the left.

#### From Goondiwindi

Travelling East on the Bruxner Wy we are 11km before Tenterfield. We are on the right.

## HOW TO REGISTER with

# ELITE LIVESTOCK AUCTIONS

Simply go to **[www.elitelivestockauctions.com.au](http://www.elitelivestockauctions.com.au)** using your desktop, laptop, iPad, iPhone or android device.

Click on the **"Sign Up"** page / link

Create a bidding profile using the bidder registration page.  
*(You can either register as a livestock agent, company or private buyer)*

Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue

Click **"Register"**

You will then be notified by email that an account has been created.

Once an account has been created you are all **"Set to Bid"**

Each Auction can then be viewed by clicking **"Live Auction"** logo on the Elite Livestock Auctions website.

Once you receive email notification that your account has been created please go to the sale you wish to bid at and click **"Request to Bid"**

The sale will then approve your application to bid and on the sale catalogue you will see **"✓Bid Request Approved"**

On Sale day simply login, click **"Enter Auction"** on the catalogue page and you can start bidding.  
*(There is no need for software download)*

At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

Having trouble registering and logging in?  
**Contact Elite Livestock Auctions**

# UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

## What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

## What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

## Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

## Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

## UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Birth	<b>CEDir</b>	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	<b>CEDtrs</b>	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	<b>GL</b>	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	<b>BW</b>	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	<b>200 Day</b>	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	<b>400 Day</b>	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	<b>600 Day</b>	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	<b>MCW</b>	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	<b>Milk</b>	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	<b>DtC</b>	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	<b>SS</b>	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	<b>CWT</b>	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	<b>EMA</b>	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	<b>Rib Fat</b>	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	<b>P8 Fat</b>	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	<b>RBV</b>	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	<b>IMF</b>	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Other	<b>NFI-F</b>	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	<b>Doc</b>	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	<b>Foot Angle</b>	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
	<b>Claw Set</b>	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.
Selection Index	<b>ABI</b>	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
	<b>DOM</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
	<b>HGRN</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
	<b>HGRS</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

# INGLEBRAE FARMS REFERENCE SIRES

## BALDRIDGE 38 SPECIAL <sup>PV</sup>

HBR

BORN: 13/01/2015

GENETIC STATUS: AMF,CAF,DDF,NHF,MAF,OSF,RGF

IDENT: USA18229487

EF COMPLEMENT 8088 <sup>PV</sup>

SIRE: EF COMMANDO 1366 <sup>PV</sup>

RIVERBEND YOUNG LUCY W1470<sup>#</sup>

STYLES UPGRADE J59<sup>#</sup>

DAM: BALDRIDGE ISABEL Y69<sup>#</sup>

BALDRIDGE ISABEL T935<sup>#</sup>

*New Sire and some of the first sons by Special to be offered in Australia. We have only a snippet of him this year but will have more in the coming years. Special has good calving ease, a strong top, good depth of rib, great muscle expression with great structure all this with the backing of the Baldrige Isabella Y69 cow, being a legend of her breed. His sons are a must to inspect. Reference Sire*

Hallmark continues to impress us at Inglebrae. His first two offerings of sons have been very much sort after by commercial breeders and have sold to \$27,500. He is breeding the OLD COOL back into the herds, with tremendous length, depth of body and a bit more framed females with high milk that all carry the soft temperament of Hallmark himself. He has become a real cow maker. Reference Sire

New Sire. We purchased Kruse in 2018 at 16 months for \$50,000. Kruse is a moderate framed bull with a long body and lovely muscle pattern with soft skin type and impeccable structure. Backed by numerous noted cow families on many lines of his pedigree. There are a handful of big, framed sons and a small line of more moderate types to suit heifer joining's. Reference Sire

Second offering of Lakeside sons and once again we are amazed at the sheer volume and power he injects into his progeny. His sons' EVB's will have growth, carcase, marble and above average milk. We inspected Lakeside when he sold at the 2016 Millah Murrah sale for \$54,000 where he showed great temperament, structure, and stood over a lot of ground, and had the backing of a tremendous cow line. Reference Sire

# CONNECTIVITY AT TODAY'S INGLEBRAE ANGUS SALE BROUGHT TO YOU BY CONNECTED FARMS

Connected Farms provide connectivity to regional and rural agricultural communities. Whether you need fence to fence coverage over your farmland, an 'on the move' satellite hotspot, or a high speed broadband link only one day a year for your livestock auction, Connected Farms can tailor a connectivity solution for your farming operation.

- Temporary connectivity for livestock auctions
- Vehicle connected 'on the move' internet hotspots
- Satellite Business Internet
- Over the farm IoT coverage
- Over the farm WiFi (voice and data)
- Over the farm Private LTE (voice and data)
- Fixed Wireless Internet

## Interested in improving the connectivity on your farm?

Tom Andrews from Connected Farms is here today, he will be over near the coffee van and is always keen for a yarn.

Scan the QR code to visit [www.connectedfarms.com.au](http://www.connectedfarms.com.au) for more information or call Tom on 0414 711 011.

**Q45 A Kruse son to start the sale and one of my picks. A good mix of pedigree with Kruse and the Bando cow line. Long, deep sided bull with a soft loose skin type. He was used as a yearling in the stud to back up the AI programme on stud heifers. Just below average birth, all growths and carcass in the top 20%, high milk and scrotal. Highly recommended, will suit heifers or cows.**

DOCUMENT TYPE

NUMBER

OFFICE OF ISSUE

EXPIRY DATE

1 Have the cattle in this consignment ever in their lives been fed feed containing animal fats?

Yes ☐ No ☒ (See Explanatory Notes)

2 Were all of the cattle born and raised on the vendor's property?

Yes ☒ No ☐ If No, how long were the cattle obtained or purchased?

(If purchased at different times, tick the box corresponding to the time of the most recent purchase.)

A. Less than 2 months ☐ B. 2-6 months ☐ C. 6-12 months ☐ D. more than 12 months ☐

3 In the past 60 days, have any of these cattle been fed by-product stockfeeds?

Yes ☐ No ☒ If Yes, attach a list of the by-product stockfeeds, date when first fed and a copy of an analyst's report if available.

4 In the past 6 months, have any of these cattle been on a property listed on the ERP database or placed under grazing restrictions because of chemical residue?

Yes ☐ No ☒ If Yes, give details:

5 Are any of the cattle in this consignment still within a Withholding Period (WHP) or Export Slaughter Interval (ESI) as set by APVMA or SAfEMER, following treatment with any veterinary drug or chemical?

Yes ☐ No ☒ If Yes, give details: (Record additional details in question 8)

6 In the past 60 days, have any of the cattle in this consignment consumed any material still within a withholding period when harvested, collected or first grazed?

Yes ☐ No ☒ If Yes, give details:

7 In the past 42 days, were any of these cattle

a) grazed in a spray risk area; or

b) fed fodders cut from a spray drift risk area? (See Explanatory Notes for definition of spray drift risk area)

Yes ☐ No ☒ If Yes, Date sprayed: / /20

Declaration

I, Darren Bathfuzzi

(FULL NAME)

Braeburn, Bruxner Wy Tenterfield 2372

(ADDRESS CONTINUED)

(TOWN/SUBURB)

(STATE)

declare as the manager responsible for the husbandry of the animals in this consignment, that the information stated in this declaration is true and correct. I also declare that none of the animals have ever been treated with HGP or products containing Oestradiol 17B and/or its est like derivatives. I have records available to demonstrate that the animals were either a) born on the property the PIC of which is shown, or b) for purchased cattle, accompanied by an EU vendor declaration attesting to their freedom from prohibited hormone treatments. I also declare that a cattle in this consignment have been properly identified by the use of the approved NLIS device. This declaration is made under the Export Control Act. I will retain a copy of this declaration for two(2) years, three (3) years in WA (giving false or misleading information is a serious offence under the Criminal Code Act 1995, the punishment for which is a period of imprisonment not exceeding 12 months).

I also declare that I have read and understood all the questions that I have answered, that I have read and understood the explanatory notes, and that, while under my control, the cattle were no restricted animal material (including meat and bone meal) in breach of State or Territory legislation.

Signature [Signature] Date 25/5/2024

\*Only the person whose name appears above may sign this declaration, or make amendments which must be initialed.

Tel no. 0461033062 Fax no.

Email darren.inglebrae@bigpond.com

Part B To be completed by the person in charge of the cattle while they are being moved.

Completion of this part is optional in SA and VIC.

Movement commenced: / /20 : (am/pm)

Vehicle registration number(s)\*:

# NOTES

Below are some quick snaps of a few sisters of the sale bulls. The females are the backbone to any breeding operation. Here at Inglebrae our sire selection is heavily focused on the females they are going to leave us, they must produce conformation and structure at the fore front for longevity of life, we never select bulls just off EBVs but they are used as a guide.

We expect the sire we use to leave us with a heifer that will calve unassisted at two years of age and calve every year, produce a feminine type, long body with good depth, and soft loose skin type that look like they will do, with enough growth to get all progeny to heavy feedlot entry weights by eighteen months of age. With a focus of calving ease, good milk, above average scrotal with positive marbling.

Sisters to the sale bulls will be on display on our Open day only, where you will be able to view all females from this year's reference sires.

(These Heifers are not for sale, they are an example of progeny of the reference sires)
